RELATED APPLICATIONS

This application is a 371 filing of PCT/JP04/06041, filed 26 April 2004.—

The following is an examiner's statement of reasons for allowance: The prior art of record fails to teach or suggest the improved porous silica coating obtained with the recited combination of an alkoxysilane compound, a surfactant and, specifically, an organic ampholyte; having a metal content not more than 50ppb. The specification as filed provides convincing support for the expectation that any ampholyte would be effective.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
